RFID Global Solution, Inc. wins role on U.S. Department of Defense RFID III on Savi Prime Contract

All US Defense Services, Federal Agencies and Allied International Defense Forces can order from RFID III

Eldersburg, MD, January 13, 2009 - RFID Global Solution, Inc., the leading government RFID integrator and pioneer in RFID solutions for defense, has been selected by the U.S. Department of Defense (DoD) to provide RFID solutions and services under RFID III on the Savi Prime Contract.

RFID III is an indefinite-delivery-indefinite-quantity (IDIQ) contract established by the U.S. Army on behalf of all Services valued at \$428 million for active Radio Frequency Identification hardware, software and engineering services. The competitively bid RFID III contract, administered by the U.S. Army's Product Manager Joint-Automatic Identification Technology (PM J-AIT) office, is open to purchase orders from other U.S. Federal agencies and allied defense forces. The initial three-year ordering period is scheduled to begin in early 2009.

RFID III calls for state-of-the-art active RFID products that provide "logistics tracking, locating and health monitoring of commodities and assets", and which are compliant with ISO 18000-7:2008 standards to enable interoperability among government users. RFID Global Solution, Inc., along with its partner Savi Technology, will offer active RFID solutions and design, planning and implementation services to the Joint Services.

"RFID Global Solution earned its stripes designing and deploying leading-edge RFID solutions for the Department of Defense. RFIDGS personnel have been deploying solutions around the globe for the DoD with Savi Technology since 1996," said Joseph Leone, President and CTO of RFID Global Solution. "RFID Global is proud to be chosen to continue its heritage as the leading RFID defense integrator, on the mission to provide state-of-the art automatic identification capabilities anywhere in the world. RFIDGS will work in unison with Savi to provide best of breed solutions."

"We're honored that Savi's proven technology solutions continue to earn the trust of the DoD through the RFID III contract," said David Stephens, chief executive officer of Savi Technology. "We are fully dedicated to continuing to deliver innovative products and solutions, along with RFID Global Solution, Inc., that support the DoD's objectives and critical operations to enhance the visibility, management and health of vital assets throughout the supply chain."

RFID Global Solution and Savi have a proven track record of successful active RFID deployments. RFID Global Solution has successfully deployed RFID solutions for the US Army's Rapid Deployment Center, Naval Air Station, Jacksonville, Defense Information Systems Agency, and Northrop Grumman Ship Systems, among others. Savi is the leading provider of active, battery-powered RFID products and solutions to the U.S. DoD, providing products and solutions to the DoD for more than a dozen years through the RFID I and RFID II contracts. RFID Global Solution and Savi helped build the DoD's In-Transit Visibility network, which is the world's largest active RFID-based cargo tracking system spanning

more than 4,000 nodes across more than 40 countries. Savi's RFID-based solutions support focused logistics, Total Asset Visibility (TAV) and integrated global supply chains for all U.S. military services.
