

## RFID GLOBAL ANNOUNCES VISI-TRAC ANALYTICS

Transforming IoT data into actionable insights

RFID Global Solution, Inc., the leading provider of asset management and supply chain solutions, is pleased to announce **Visi-Trac Analytics**, providing a new level of real-time operational intelligence that empowers companies to forecast future outcomes, prevent operational disruptions, and improve supply chain performance.

The capabilities are endless with **Visi-Trac Analytics** which transforms the massive amounts of data generated from the IoT into actionable information.

### Visi-Trac Analytics delivers:

**Insights through advanced analytics that give actionable information and let you capitalize on the value of complex data.**

**Sophisticated, personalized reports and critical, top-level views of your organization via operational dashboards.**

**Automated delivery of personalized reports and dashboards for every user when and where they need it.**

## Key Features

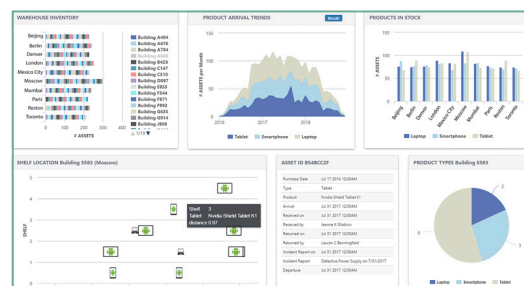

**Analytic Dashboards** – Explore an array of data visualization options, including geomaps, facility floor plans, charts, trend lines, asset tables, rack and shelf images, and custom data displays. Create your own dashboards with our easy-to-use, self service tools.

**Diverse Data Sources** – Visi-Trac supports multiple data capture technologies (barcode, RFID, RTLS and GPS) in one integrated platform. Bring all your critical data into a single enterprise view by connecting to a diverse range of data sources.

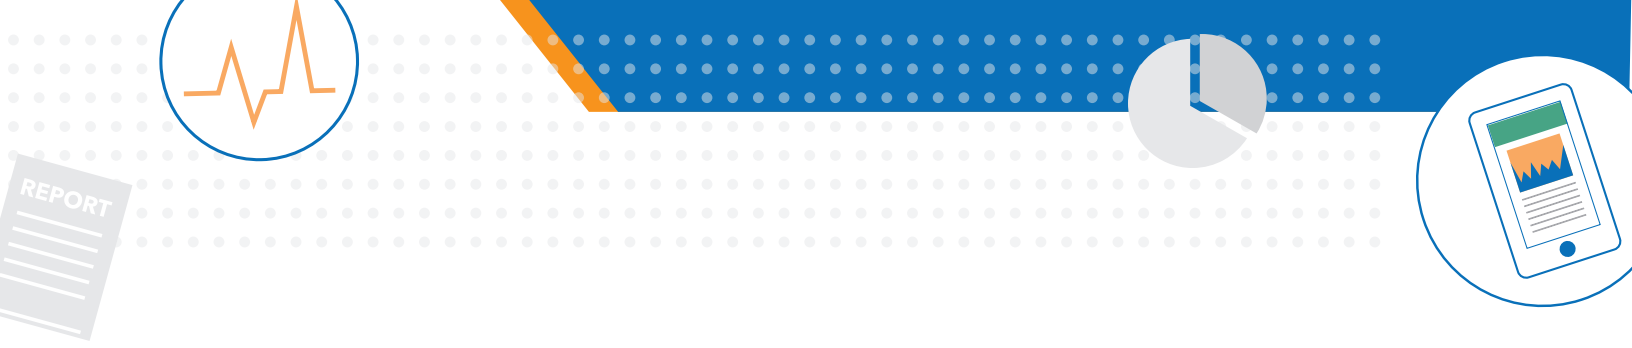

**Alerts** – Send and receive notifications when assets have crossed boundaries, exceeded thresholds, or an unexpected event occurs. Alerting options include email, SMS, lights and sirens.

**Scalability** – Visi-Trac has a highly scalable, distributed architecture with millions of assets under management and was designed for enterprise-scale deployments.

**Deployment** – Manage and deploy analytics in the cloud or on premise.

Visi-Trac Analytics Key Performance Metrics

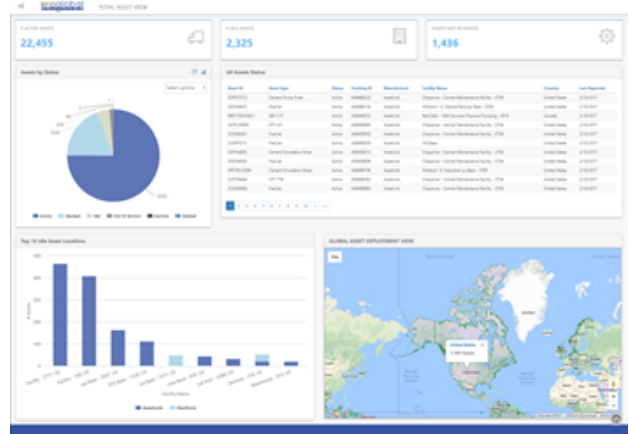

## Benefits

Visi-Trac Analytics delivers:

**Actionable Insights** – Visi-Trac advanced analytics generate actionable information and business insights on any aspect of your business. Accurate, real-time data improves operational efficiencies, compliance and security.

**Automation** – Schedule automatic delivery of updated, personalized reports for every user, when and where they need it, including mobile devices.

**Return on Investment** – Visi-Trac Analytics enables managers to manage their assets with greater accuracy and frequency, increasing asset utilization and reducing capital expenditures.

## RFID GLOBAL 2018 PRODUCT RELEASE

### Transforming IoT data into actionable insights

The ability to know where something or someone is located is core to many companies' success. Having that level of granular information at one's fingertips changes the way business managers can make rapid, data-driven decisions. Without a doubt, knowing where something is located is highly important, but actionable data about the asset is what everyone needs in order to make smarter business decisions.

That is why we created **Visi-Trac Analytics™**. At its core, it is an asset management platform that empowers anyone to answer questions well beyond where an asset is with useful and actionable data. In addition to having all the analytical tools one would expect, such as dashboards, reports and key metrics, it gives businesses the ability to forecast, prevent disruptions, track the lifecycle of any item, and improve supply chain processes.

#### Visi-Trac Analytics Highlights

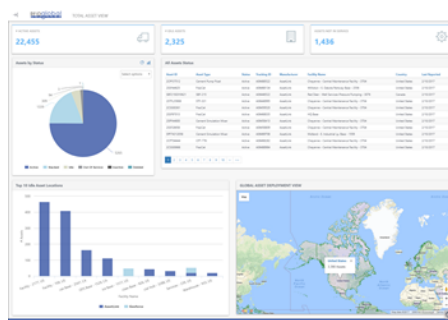

- View enterprise level business analytics
- Locate assets and people, real-time or historically
- Track assets through their entire lifecycle
- Analyze large data sets from diverse data sources
- Create do-it-yourself dashboards

- Asset location, history and utilization reports
- Visibility down to shelf, aisle or rack
- Alerts and warnings for any tracked asset
- Highly scalable architecture
- On and off-premise solutions

**Visi-Trac Analytics** allows users to run simple and complex analyses on large data sets or drill down to an individual tracked item with ease. Having the flexibility to rapidly create custom dashboards with our 'Do It Yourself' self-service dashboard or letting **Visi-Trac** do the heavy lifting, is a hallmark of our system.

At the end of the day, being able to forecast, create reports, and analyze huge amounts of data simply allows for smarter decisions to happen more often. This is what makes **Visi-Trac** a true business intelligence tool.
